Professional Summary

Senior cloud, platform, and enterprise integration architect with more than 15 years of experience designing, building, modernizing, and supporting distributed systems, SaaS platforms, data platforms, and mission-critical enterprise applications.

Experienced across Azure, AWS, and GCP, with hands-on expertise in cloud-hosted systems, Azure SQL, Docker, Kubernetes, CI/CD, RESTful APIs, messaging platforms, SQL-backed architectures, reusable integration layers, and high-performance data pipelines.

Known for strong architectural judgment, rapid problem diagnosis, production stability, and the ability to connect application, data, integration, infrastructure, and operational concerns into practical, maintainable cloud solutions.

Core Competencies

- | | |
|--|--|
| • Architecture guidance, stakeholder alignment, and technical leadership | Performance tuning, incident diagnosis, and production support |
| • Azure, AWS, and GCP cloud environments | • RESTful APIs, microservices, and distributed systems |
| • Cloud architecture and platform modernization | • SaaS architecture and multi-tenant platform design |
| • Docker, Kubernetes, and CI/CD delivery patterns | • SQL Server, Azure SQL, PostgreSQL, and data platform reliability |
| • Legacy modernization and cloud migration support | |

Experience

Independent Technical Projects & Platform Engineering

04/2024 – current

- Architected and developed ReviewNudge™ (reviewnudge.dourl.net), a multi-tenant micro-SaaS platform that automates customer review requests, follow-ups, workspace administration, and review-status tracking for service businesses.
- Designed and developed Portmason™ (www.etal.solutions), a portable automation platform that standardizes application provisioning, deployment, configuration, and operations across local and cloud environments
- Designed and implemented .NET applications, APIs, integration components, automation workflows, relational data solutions, reporting processes, and A.I.-assisted automation using cloud-ready architectural patterns and repeatable Docker-based environments.
- Designed, built, and maintain the public Et al Solutions technology platform (<https://etal.solutions>), demonstrating modern web architecture, API integration, automated deployment, and technical content deliver

Project Consulting Services, Inc. (via TEKsystems) — Senior Consultant

Industry / Client Focus: Oil & Gas, provides professional services for energy infrastructure

08/2015 – 04/2024

- Built and supported middleware and backend integration systems connecting multiple enterprise platforms using SQL-based data pipelines, messaging patterns, RESTful services, and service-oriented designs.
- Reduced data-processing latency from 24+ hours to near real-time through event-driven architecture and optimized data-flow designs.
- Established SQL performance standards and tuning practices across large-scale SQL Server and Azure SQL environments, improving reliability, scalability, and performance.
- Partnered with engineering and infrastructure teams to troubleshoot production systems, support cloud-hosted environments, and improve overall system resilience and operational performance.

Planned Career Sabbatical & Independent Technical Projects

03/2014 – 08/2015

- Took an intentional career break while continuing hands-on technical work and professional development.
- Built .NET/MVC and browser-based applications using HTML5, CSS3, JavaScript, and SQL-backed application architecture.
- Developed responsive user interfaces, database-driven workflows, reporting views, and analytics outputs.
- Explored legacy-modernization approaches using web applications, relational databases, APIs, and integration patterns.

Steton Technology Group — Lead Architect

Industry / Client Focus: Food & Hospitality, SaaS platforms, mobile data collection

01/2004 – 03/2014

- Led architecture, development, and operation of a multi-tenant SaaS QA auditing platform supporting thousands of enterprise users.
- Designed scalable data models, backend systems, reporting layers, and architectural patterns to support high-volume concurrent workloads, extensibility, maintainability, and operational stability.
- Implemented Azure- and AWS-based infrastructure improvements to increase scalability, availability, reliability, and overall system performance.
- Designed a disaster recovery strategy with a 4-hour recovery time objective and 8-hour recovery point objective, incorporating encryption throughout the disaster recovery lifecycle.

Technical Skills

Cloud Platforms

Azure, AWS, GCP, Azure SQL Database, Azure SQL Managed Instance, cloud-hosted SaaS platforms

Cloud & DevOps

Docker, Kubernetes, CI/CD pipelines, GitHub Actions, Terraform, Jenkins, system monitoring, troubleshooting, production support

Architecture

Cloud architecture, SaaS architecture, multi-tenancy, distributed systems, microservices, SOA, event-driven architecture, 12-Factor App, SOLID, CQRS

Backend & APIs

C#, .NET Core / Web API, RESTful APIs, asynchronous processing patterns, MVC, reusable service components

Data & Databases

SQL Server 2022, Azure SQL Database, Azure SQL Managed Instance, PostgreSQL, Redis, SQLite, Oracle (8i), query optimization, indexing strategies, data platform reliability

Programming & Scripting

C#, Java, Python, JavaScript, TypeScript, Bash, PowerShell, T-SQL, PL/SQL, HTML, CSS

Leadership

Architecture guidance, technical mentorship, stakeholder alignment, requirements translation, cross-team collaboration
